

AMAZON SALES DATA ANALYSIS

Power BI Project By : Bhivanshu Shrivastava

PROJECT OVERVIEW

- This project is a **Power BI dashboard** designed to analyze and visualize Amazon product performance data. It provides a **comprehensive view of sales, discounts, ratings, and category trends** to help in decision-making and performance tracking.

DATA SET & DATA MODELING

- **Data Set : -**

- product_id, product_name, category, actual_price, discounted_price, discount_percentage, rating, rating_count, user_id.

- **Data Modeling : -**

- **Fact Table** : Sales & performance (prices, discounts, ratings).
- **Dimension Tables** :Product, Category, User.
- **Relationships:** product_id → Product, category → Category, user_id → User.
- **DAX Measures** : Average Discount, Average Rating, Average Selling Price, Total Products, Total Reviews.

DASHBOARD & KPI'S

Dashboard :

- Built in Power BI with filters (Category, Price Range, Product, Discount %) and visuals like bar charts, line charts, and scatter plots to analyze prices, discounts, ratings, and categories.

KPIs :-

- Average Discount: **47.7%**
- Average Rating: **4.10**
- Total Products: **1K**
- Average Selling Price: **₹3K**
- Total Reviews: **27M**

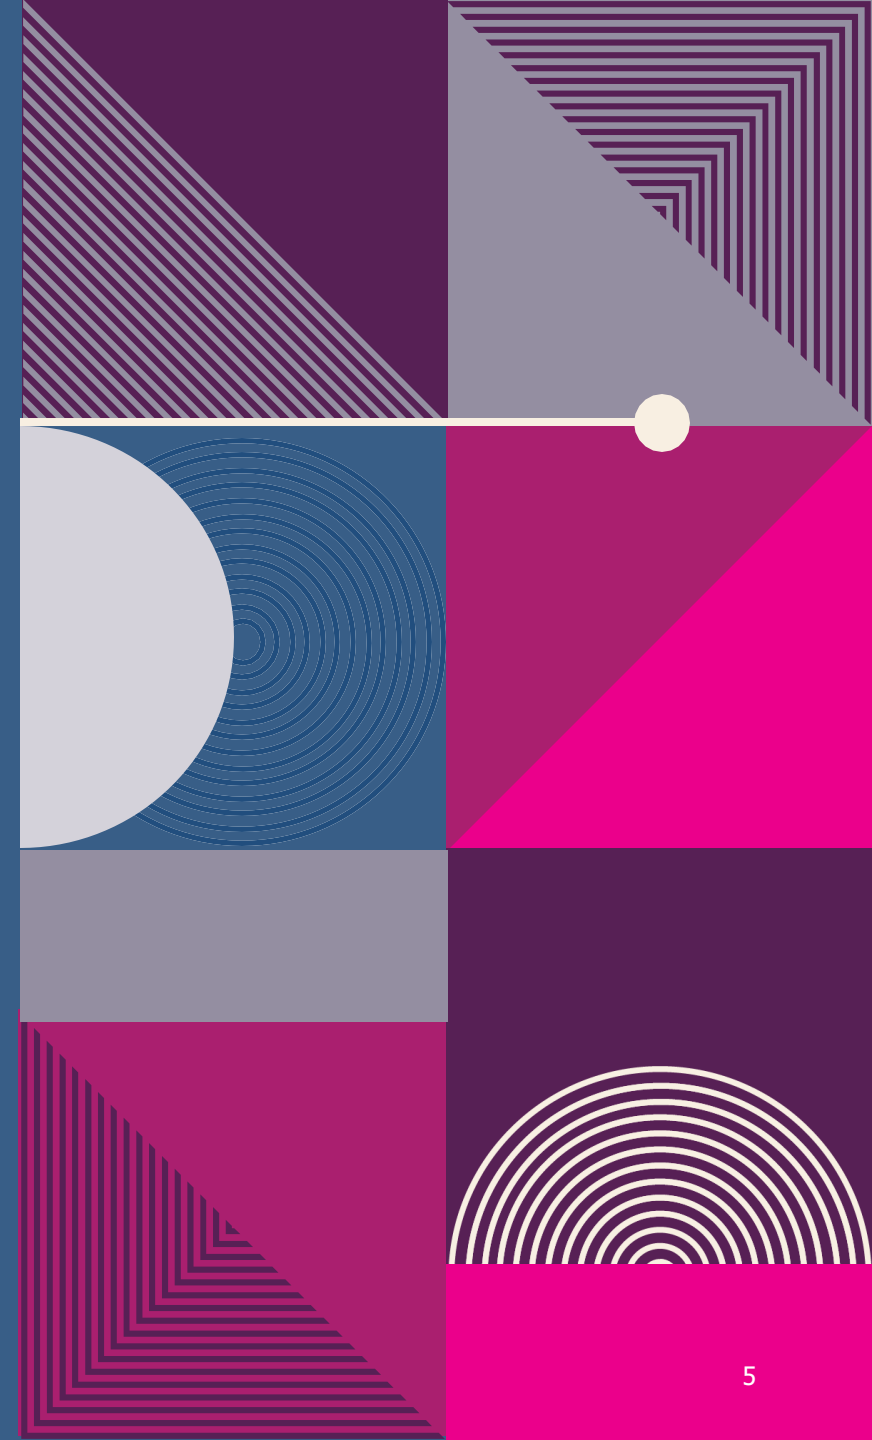

KEY INSIGHTS & OBSERVATIONS

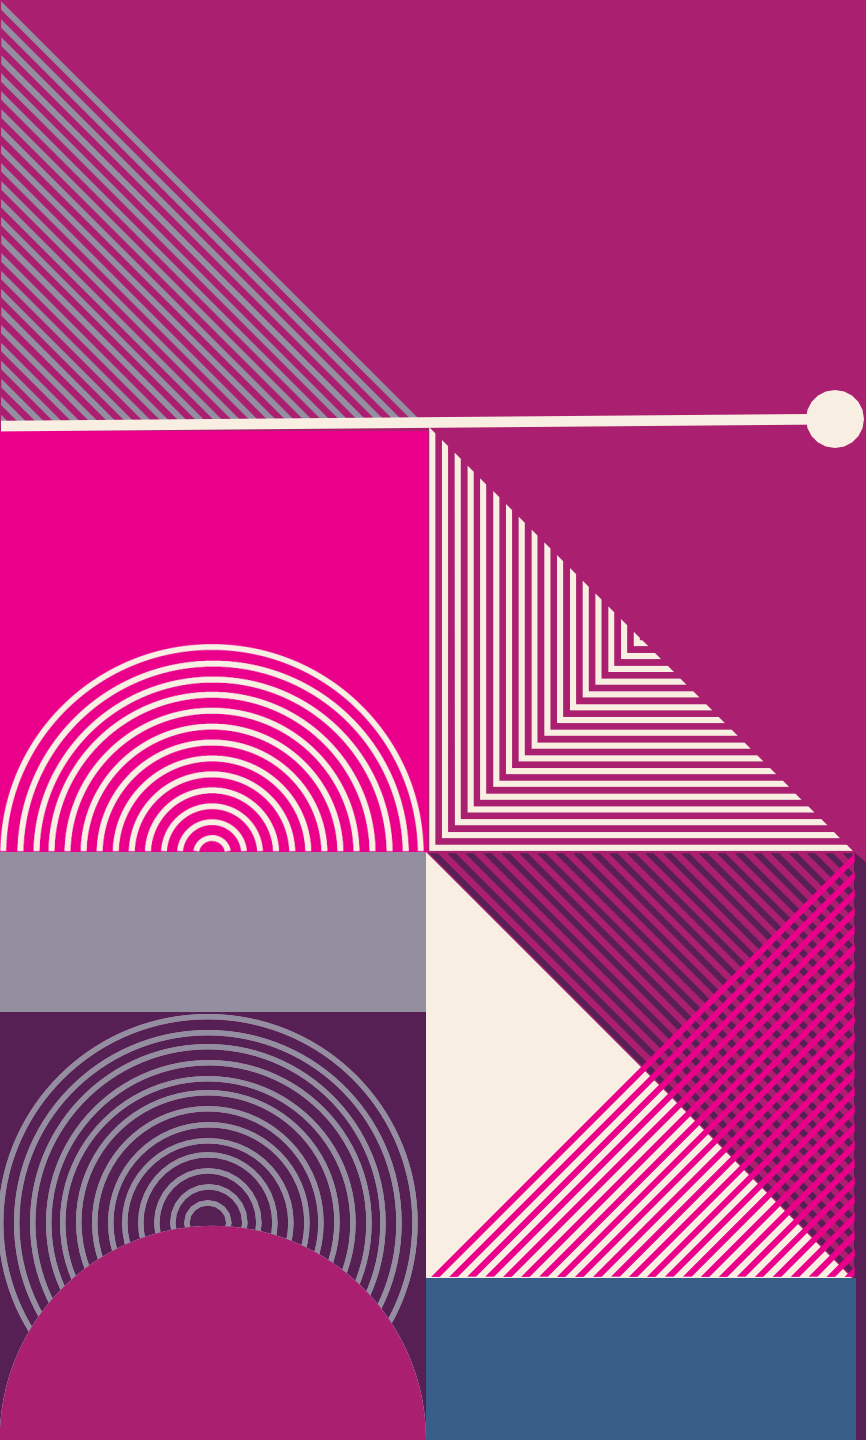

Operations :-

- Data cleaned, modeled into fact & dimension tables, DAX measures created, interactive filters applied, visuals built in Power BI.

Insights :-

- Discounts are high (47.7%) → aggressive pricing.
- Ratings strong (avg 4.10) → good customer satisfaction.
- Electronics & Computers dominate categories.
- Mid-range products often rated better than premium.
- 27M reviews → strong customer engagement.

LEARNING & CONCLUSIONS

- **Learning** → Clean data, proper modeling, and clear KPIs make dashboards powerful.
- **Conclusions** →
 - Discounts are high → competitive pricing.
 - Ratings strong → customers satisfied.
 - Electronics & Computers lead categories.
 - Mid-range products perform best.
 - Reviews huge → strong engagement.
